

NB The Zone of Theoretical Visibility (ZTV) image illustrates the theoretical extent of where turbines will be visible from assuming 100% visibility. It is generated using terrain data only and does not take into account any screening that vegetation or the built environment may provide. It is 'as such' a worst case ZTV and the actual extents of visibility are likely to be much less extensive.

Title: Principal Visual Receptors to 15km with ZTV to Blade Tip
