
20. HEALTH AND SAFETY

20.1. Introduction 20-2

20.2. Summary of Effects 20-2

20. Health and Safety

20.1. Introduction

20.1.1. This Chapter does not repeat the information set out in *Chapter 20: Health and Safety* of the Shepherds' Rig EIA Report (November 2018) where that information remains valid in the context of the reduced number of turbines now proposed as the Revised Development (AEI Figure 4.1). As such, the Additional Environmental Information (AEI) supplements Chapter 20 of the EIA Report (November 2018) and should be read in conjunction with it.

20.2. Summary of Effects

20.2.1. The Development was identified as low risk for health and safety as detailed in the EIA Report (November 2018). The revisions to the turbine layout, as shown on **AEI Figure 4.1**, would not give rise to any additional effects, and the assessment as presented in *Chapter 20: Health and Safety* of the EIA Report (November 2018) remains valid.

20.2.2. Effects on Health and Safety associated with the Revised Development are considered to be not significant. This represents no change to the conclusions outlined in the EIA Report (November 2018).
