Wind Farms Theoretically Visible

- Shepherd's Rig Wind Farm visible only
- Margree visible only
- Shepherd's Rig Wind Farm and Margree visible

This CZTV image illustrates the theoretical extent from where all or part of the development would be visible from a view height of 2m. The image is produced using terrain data assuming 100% visibility. It does not take account of screening that vegetation or the built environment may provide. It therefore represents a 'worst-case' ZTV and the actual extent of visibility is likely to be much less extensive.
